WHO WE ARE

Quad Medical Limited is a Care Quality Commission regulated independent ambulance service. Our Managing Director Paul Saddington founded the company in 2011 after spending 17 years on the frontline of the NHS working for the London Ambulance Service. Since 2011 Quad Medical Limited has recruited and employed a wide range of healthcare professionals from welfare staff, first aiders, first responders, Emergency Medical Technicians to Nurses, Paramedics and Doctors. This diverse multidisciplinary team are committed to providing high quality patient care in any environment. Although they may come from a wide and varied background, every team member has brought .

their own unique skills and understanding to help develop the company, its working practices and its governance frameworks. All of our staff are Disclosure and Barring Service screened and complete a rigorous mandatory training package including; Mental capacity, health and safety, manual handling, Safeguarding adults and children, Fire Safety, Infection prevention and control to name just a few. This gives our clients the peace of mind that all of our staff are prepared to care for patients from diverse backgrounds, with wide and varying individual needs with compassion, care and competence.

JUMBULANCE

After many years providing temporary Emergency and Urgent care services we have invested in two, four bedded mobile treatment units.

Quad Medical Limited and its staff have become specialists in providing treatment and care in temporary and unique environments. From festival fields to warehouses, the Quad Medical Team are flexible, adaptive and responsive to their surroundings and in the provision of 'field hospitals'.

To enhance service provision QML have invested in two Jumbulances. The Jumbulances are buses that have been adapted to a high calibre to house four patient bays inside each vehicle.

Historically the NHS has used both Jumbulances to create instant additional patient capacity in times when the service is under extreme pressure.

JUMBULANCE

Temporary capacity solutions provided by experienced healthcare professionals.

Bedside Monitoring

Each patient bay comes equipped with patient monitoring including: Cardiac monitoring, Blood pressure monitoring, pulse oximetry, temperature and blood sugar monitoring.

Emergency Equipment

Every bed space has piped oxygen and suction. Power outlets are also available for additional equipment.

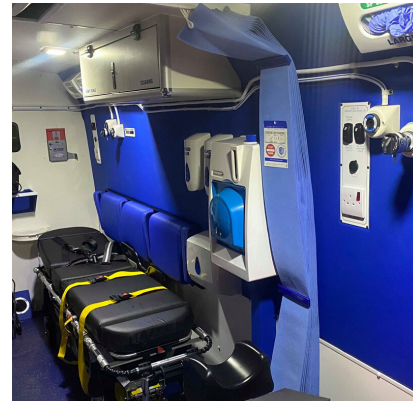

Handwashing Facilities

Onboard each bus is a sink with running water for hand washing, alongside alcohol hand gels.

Temporary capacity solutions provided by experienced healthcare professionals.

Privacy, Dignity & Accessibility

Access to the bus for those that have mobility issues is via a tail lift. This means that each bus is accessible to most patient groups.

To ensure that each patient can receive private and dignified care, each bed space has its own curtain rail with disposable curtain which can be changed as required or inline with infection prevention and control guidance.

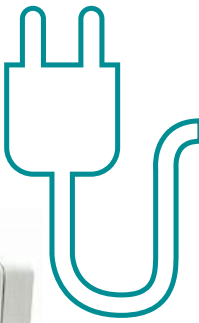

JUMBULANCE

Temporary capacity solutions provided by experienced healthcare professionals.

Mains Power

Both Jumbulances are equipped with a shoreline that can be plugged into a mains power supply to keep all equipment and lighting on board powered.

On Board Generator

If needed each Jumbulance is also fitted with specialist diesel generators (normally installed on boats) which are by design much quieter than standard diesel generators.

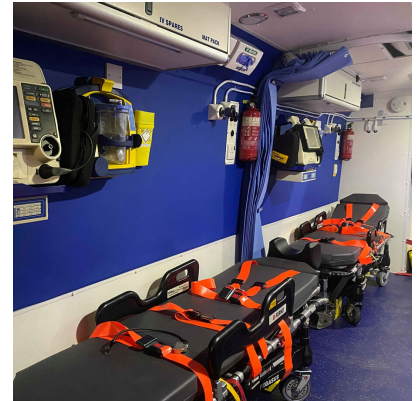

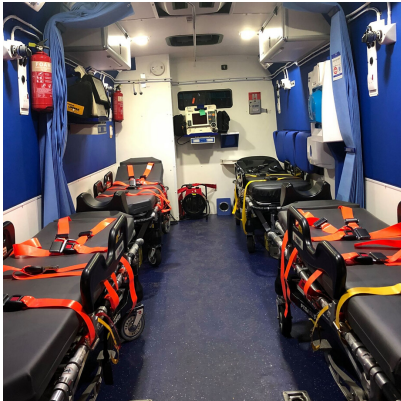

Comfort in all climates

To ensure the comfort of patients and staff in all conditions the Jumbulances each have in built air condition/heating units

Flexibility & Service Demand

We understand that every organisation is different. That is why any client wishing to hire the Jumbulances will be met by an experienced, professional member of the management team who can help create bespoke patient pathways and criteria for the safe use of the buses.

The Quad Medical Management team will also work with clients to create a tailored staffing plan which can include registered professionals, ambulance personnel and healthcare support workers, to suit the individual clients needs and expectations.

Being mobile resources the Jumbulances can be hired on temporary and a rolling basis and can be moved to any location within the clients grounds to suit their institutions needs.
